

Competition Analysis

Source: superteam.fun/earn/listing/build-at-whu

Analysed on: 29 September 2026

Overview

Competition: Build an MVP with Solana at WHU

Organiser: Superteam Germany

Status:

Submissions Open

Private

Region: Germany only

Deadline: ~5 days 6 hours remaining (as of 29 Sep 2026)

Winner Announcement: October 08, 2026

Current Submissions: 3

Prize Pool

Rank	Prize
1st Place	1,500 USDG
2nd Place	1,000 USDG
3rd Place	500 USDG
Total	3,000 USDG

Skills Required

- Frontend

- Backend
- Blockchain
- Design

The Challenge

Build a working MVP using at least one Solana feature. All backgrounds welcome, no blockchain experience needed. AI tools encouraged.

- Find a real problem and explain who you're solving it for.
- Build a working prototype using at least one Solana feature.
- Make your product easy for its intended users to understand and use.
- Explain what makes your idea useful and how you could reach your first users.

Key quote: "Start small — one useful feature that works is enough for a first prototype."

Judging Criteria

- **A useful idea:** Does it solve a clear problem?
- **A working prototype:** Can you demonstrate the core idea?
- **A clear role for Solana:** Does using Solana help the product?
- **Potential to grow:** Who would use it, and why?

Inspiration Areas

Category	Description
Payments	Sending money, subscriptions, or business payments
AI	Tools and services that let AI agents make payments or interact with applications

Physical Infrastructure	Connectivity, energy, mobility, or shared computing
Finance	Saving, lending, trading, or managing money
Digital Ownership	Collectibles, memberships, or tokenized assets
Identity & Privacy	Credentials, reputation, or control over personal information
Consumer Apps	Games, social products, marketplaces, or mobile experiences

Submission Requirements

- Must be a WHU Hackathon 2026 participant.
- Build a working prototype that uses Solana.
- Submit pitch-deck link in the bounty submission field.
- Provide a public GitHub repository.
- Follow @SuperteamDE on X.

Strategic Observations

- Only **3 submissions so far** with ~5 days left — very low competition.
- Private listing means only WHU Hackathon 2026 participants can enter — a **controlled, smaller field**.
- AI + Solana integration is explicitly highlighted — **AI agents making on-chain payments** is a strong differentiator.
- Judges explicitly look for Solana having a *necessary role* — don't just bolt on blockchain.
- Both a pitch deck AND GitHub repo are required — presentation and code quality both matter.
